## Brown Fused Alumina F150

Grade / size: F150 | Product family: F Grit

Document ID: CY-PDS-EN-2296 | Version: 1.0 | Date: 2026-10-02

### Product overview

Brown Fused Alumina F150 is a CHAORYAN f grit product for bonded abrasives, blasting and industrial grinding. Confirm the grade, chemistry, particle size distribution and packing in the agreed technical specification.

### Specifications

|                |                                                          |
|----------------|----------------------------------------------------------|
| Product        | Brown Fused Alumina F150                                 |
| Grade / size   | F150                                                     |
| Product family | F Grit                                                   |
| Packing        | Confirm bag or bulk packing and labeling with the order. |

### Chemical composition

| Parameter                          | A           | A-B       |
|------------------------------------|-------------|-----------|
| Al <sub>2</sub> O <sub>3</sub> (%) | 94.00–97.50 | ≥91.00    |
| TiO <sub>2</sub> (%)               | 1.50–3.80   | 1.50–4.20 |
| CaO (%)                            | ≤0.45       | —         |

### Physical properties

| Parameter                             | A         | A-B    |
|---------------------------------------|-----------|--------|
| Magnetic content ≤ (%)                | 0.0180    | 0.0440 |
| Calcination temperature (°C), A grade | 1050–1350 | —      |

### Particle size distribution

Distribution limits and sieve fractions are confirmed in the agreed technical specification and batch test report.

### Applications

Bonded abrasives, blasting and industrial grinding.

### Processing and packing

Discuss particle shape, grading and sample matching for the intended process.

Confirm bag or bulk packing and labeling with the order.

Specific guaranteed values follow the agreed technical specification and batch test result.
