PRODUCT DATA SHEET

Luoyang Naibao New Materials Co., Ltd.

Brown Fused Alumina F320

Grade / size: F320 | Product family: F Grit

Document ID: CY-PDS-EN-2301 | Version: 1.0 | Date: 2026-10-02

Product overview

Brown Fused Alumina F320 is a CHAOTYAN f grit product for bonded abrasives, blasting and industrial grinding. Confirm the grade, chemistry, particle size distribution and packing in the agreed technical specification.

Specifications

Product	Brown Fused Alumina F320
Grade / size	F320
Product family	F Grit
Packing	Confirm bag or bulk packing and labeling with the order.

Chemical composition

Chemical limits for this product are confirmed in the agreed technical specification and batch test report. Please request the current specification.

Physical properties

Parameter	A	A-B
Calcination temperature (°C), A grade	1050–1350	—

Particle size distribution

Distribution limits and sieve fractions are confirmed in the agreed technical specification and batch test report.

Applications

Bonded abrasives, blasting and industrial grinding.

Processing and packing

Discuss particle shape, grading and sample matching for the intended process.

Confirm bag or bulk packing and labeling with the order.

Specific guaranteed values follow the agreed technical specification and batch test result.
