PRODUCT DATA SHEET

Luoyang Naibao New Materials Co., Ltd.

Brown Fused Alumina 220 Mesh-to-Zero Fine Powder

Grade / size: 220 mesh to zero | Product family: Standard Fine Powder

Document ID: CY-PDS-EN-2330 | Version: 1.0 | Date: 2026-10-02

Product overview

Brown Fused Alumina 220 Mesh-to-Zero Fine Powder is a CHAORYAN standard fine powder product for refractory, casting and industrial filler formulations. Confirm the grade, chemistry, particle size distribution and packing in the agreed technical specification.

Specifications

Product	Brown Fused Alumina 220 Mesh-to-Zero Fine Powder
Grade / size	220 mesh to zero
Product family	Standard Fine Powder
Packing	Confirm bag or bulk packing and labeling with the order.

Chemical composition

Chemical limits for this product are confirmed in the agreed technical specification and batch test report. Please request the current specification.

Physical properties

Confirm the required physical properties in the agreed technical sheet and batch test result.

Particle size distribution

Distribution limits and sieve fractions are confirmed in the agreed technical specification and batch test report.

Applications

Refractory, casting and industrial filler formulations.

Processing and packing

Discuss particle shape, grading and sample matching for the intended process.

Confirm bag or bulk packing and labeling with the order.

Specific guaranteed values follow the agreed technical specification and batch test result.
