PRODUCT DATA SHEET

Luoyang Naibao New Materials Co., Ltd.

Brown Fused Alumina for Refractory Bricks

Grade / size: Application specific | Product family: Refractory Grain

Document ID: CY-PDS-EN-2372 | Version: 1.0 | Date: 2026-10-02

Product overview

Brown Fused Alumina for Refractory Bricks is an application product in the CHAORYAN refractory grain range. Select the grade and particle form against the process, target result and agreed specification.

Specifications

Product	Brown Fused Alumina for Refractory Bricks
Grade / size	Application specific
Product family	Refractory Grain
Packing	Confirm bag or bulk packing and labeling with the order.

Chemical composition

Chemical limits for this product are confirmed in the agreed technical specification and batch test report. Please request the current specification.

Physical properties

Confirm the required physical properties in the agreed technical sheet and batch test result.

Particle size distribution

Distribution limits and sieve fractions are confirmed in the agreed technical specification and batch test report.

Applications

Castables, bricks and refractory mixes.

Processing and packing

Discuss particle shape, grading and sample matching for the intended process.

Confirm bag or bulk packing and labeling with the order.

Specific guaranteed values follow the agreed technical specification and batch test result.
